

Produce Weighing and Bagging System

Set the standard in produce packaging weight accuracy, speed and bottom line savings. This advanced, highly dependable system automatically dispenses from 20 to 100 pounds of potatoes, onions, carrots, parsnips, walnuts and similar produce into cartons or paper, mesh, burlap and poly bags. Up to 400 50 pound bags-per-hour is typical.

FEATURES

- 20 lb to 100 lb fill weights
- Up to 400 50 lb bags per hour
- Heavy duty all steel construction
- Automatic bag clamp
- Casters for portability
- Self contained feeding and filling unit
- Box filling option

OPTIONS

- 20 lb to 25 lb (44 kg to 55 kg) bagging head
- 90 degree bagging head bracket
- Box loading platform
- Jaw size reducers
- Extra weight box
